Computer system host switching

Umschalten eines Systemwirtsrechners

Commutation d'un hote d'un system d'ordinateur

PATENT ASSIGNEE:

Compaq Computer Corporation, (687792), 20555 S.H. 249, Houston Texas 77070, (US), (Proprietor designated states: all)

INVENTOR:

Goodrum, Alan L., 16522 Avenfield, Tomball, Texas 77375, (US)

Sides, Chi Kim, 16503 Hexham Drive, Spring, Texas 77379, (US)

Miller, Joseph P., 12906 Golden Rainbow Drive, Cypress, Texas 77429, (US)
 Cox, Tod B., 9710 Shepperton Court, Houston, Texas 77065, (US)
 Cook, M. Damian, 15119 Prairie Rose, Houston, Texas 77070, (US)
 Sanders, Michael C., 18327 Champion Forest Drive, Spring, Texas 77379,
 (US)

LEGAL REPRESENTATIVE:

Brunner, Michael John et al (28871), GILL JENNINGS & EVERY, Broadgate
 House, 7 Eldon Street, London EC2M 7LH, (GB)

PATENT (CC, No, Kind, Date): EP 817055 A2 980107 (Basic)
 EP 817055 A3 980422
 EP 817055 B1 030502

APPLICATION (CC, No, Date): EP 97303800 970604;

PRIORITY (CC, No, Date): US 658582 960605

DESIGNATED STATES: DE; FR; GB; IT

INTERNATIONAL PATENT CLASS: G06F-011/20

ABSTRACT WORD COUNT: 132

NOTE:

Figure number on first page: NONE

...SPECIFICATION queue(underscore)select(1:0)) is used to select which data
 buffer's valid line **register** 2062 is used to generate the
 pmwq(underscore)valid(underscore)lines(7:0) signal. When...information
 such as the address to be read from or written to, the PCI command **code**
 , byte enables, address and data parity bits, "locked cycle" and "dual
 address cycle" indication bits...

...to three delayed request transactions at once. A cable interface block
 2102 claims delayed request **transactions** from the cable decoder and
 places them into the queue memory 2100. The following table...given time.
 To do so, the valid pointer logic block 2142 maintains two four-slot
registers : a DCQ buffer **number register** 2144 and a validation
 request **register** 2146. The buffer **number register** 2144 maintains
 the three-bit DCQ buffer number, as determined by the DCQ buffer number
 ...

...DCQ buffers whose numbers are stored in the four slots 2148a-d of the
 buffer **number register** 2144. The request bit in each slot 2150a-d of
 the validation request register 2146...

...2156, 2158, 2160, and 2162 and 2x4 decoder 2164 are arranged to load the
 buffer **number register** 2144 in this manner. Likewise, the
 corresponding bit in the validation request register 2146 is...

...dcq(3:0)) that indicates which of the DCQ buffers pointed to by the
 buffer **number register** may have its valid pointer updated. The
 mca(underscore)run(underscore)dcq(3:0) signal...treated specially. When a
 multi-threaded master is detected, a corresponding bit in the
 configuration **registers** is set to indicate that the device is able to

sustain multiple outstanding delayed transactions...the PLLs are locked. Thus, the bridge chip pair can come up to an error- **free communication** state without **software** intervention. The lock indication bit also provides some diagnostic information which can distinguish between a...

Build 10-band graphic equalizer for stereo with DSP technology. (digital signal processor)

Lane, John

Electronic Design, v36, n12, p95(6)

May 26, 1988

ISSN: 0013-4872 LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT

WORD COUNT: 2737 LINE COUNT: 00214

... audio sampling frequency is 44.1 kHz, the compact-disk player's bit clock (BCLK) **runs** at 48 X 44.1 kHz or 2.1168 MHz. Its word clock (WCLK) **runs** at 1/24 of the BCLK (88.2 kHz) while the left-right clock (LRCLK) **runs** at 44.1 kHz. These signals are tapped from the compact-disk player before the...

...a converter receives the data a total of two words later. This latency of two **sample** periods doesn't cause any undesirable effects, because everything becomes delayed by the same amount...

...same results (but with latency), useful for debugging.

Two independent routines make up the basic **software** algorithm of the graphic equalizer: the slide-potentiometer-scanning and the **sample**-processing-interrupt routines. The slide-potentiometer routine (Fig. 5a) scans 21 slide potentiometers and reduces the read out of their 8-bit values to 5-bit indexes to **limit** the size of the gain lookup table. the looked-up values are then stored for use by the **sample**-processing routine.

The sample-processing routine (Fig. 5B) consists of two nearly identical sections: one...

...as y(n). MOVE B,X:STD ;Write y(n) to SSI Transmitter

The external **sample** -rate clock from the compact-disk **player** activates the interrupt. The first two instructions read the data from a and the SSI...

...address).

The number of terms in the difference equation (Eq. 7, again) determines the minimum **execution** time. In this case, the number of multiply-accumulate operations needed to calculate y(n) is four terms. The actual **execution** time then depends on how the data is stored, indexed, and manipulated by the seven...

...in the difference equation. The details depend on tradeoff considerations for the remainder of the **software** system.

Web wars: which are the most valuable weapons? (factors determining success of Internet applications in three major business groups) (includes related article on strategic outsourcing) (Internet/Web/Online Service Information)

Strom, David

Datamation, v43, n4, p56(5)

April, 1997

ISSN: 0011-6963

LANGUAGE: English

RECORD TYPE: Fulltext; Abstract

WORD COUNT: 2492 LINE COUNT: 00196

...ABSTRACT: that which technologies are the best competitive weapons is not always obvious. Sites using heavy ' **flash** ' and 'sizzle' gain media attention but not necessarily return visits because they tend to be...

...and overly complex technology alienates users, particularly those with older browsers or slow connections. Video **players** give manufacturers a potential new sales force when used for product **emos** , but many Web videos are crude, and a searchable online catalog is more powerful as...

...use small, easy-to-load graphics, while overly flashy ones force users to download a **plug - in** in order to view tiny, fuzzy multimedia clips. A few sites let users choose between...

... technology that's used for delivering dynamic and nontextual information? Is it the convenience of **free** -text searches, or the way the site has aggregated its content? In the manufacturing, automotive...

...easy money early advocates thought the Web would yield.

While sites that make use of **flash** and sizzle get lots of media attention, they don't necessarily have the depth to...

...words, the vast majority of Web visitors.

Flirting with disaster

In the manufacturing industry, video **players** such as those made by VDOnet Corp. of Palo Alto ([http:// www.vdo.net](http://www.vdo.net)) give companies a potential new salesforce with interactive and lively product **emos** . Unfortunately, they also present opportunities to turn off a whole generation of new customers. We...

...industrial parts distributor based in Eden Prairie, Minn. Both have admirably included VDOnet's video **players** into their pages. But the videos are too small and too fuzzy, and **play** way too long (some for several minutes) to be of much use. The pages may...

...data-access technology happens behind the scenes and without the help of external viewers or **plug - ins** . The best implementations don't require visitors to do anything apart from perhaps authenticating their...

...from Sunnyvale, Calif.-based Saqqara Systems

(<http://www.saqqara.com/products>). Called Step Search, it **runs** on a UNIX/Oracle database server. This product prepares a series of Web-based forms...

...t charge a fee, but it requires registration, which brings up another

point: Don't **restrict** access unless you provide value. While some sites require registration just to track visitors, AMP's **registration** provides **value** and isn't an obstacle. By registering, you enable AMP to present, in the language...

...intelligently. We hiccuped at the Honda site (<http://www.honda.com>) because a series of **QuickTime** videos either didn't load or had broken links.

If you take a look at America, you'll see a few cheesy MacroMedia **Shockwave** videos (<http://www.macromedia.com>) that offer small and not well-defined pictures of the...

...of a commercial Web site is to require as little as possible from the visitor, **Shockwave** requires you to download a viewer or plug4n for your browser on a variety of...

...to several thousand dollars. You'll also need to download a special viewer application or **plug - in** for your browser from the company; these are available for Windows95, Windows 3.1, and...

...system you are using and automatically puts you in the right place so you can **run** the appropriate Windows or Macintosh **software**.

Unlike many other sites, Land Rover's offers some real use for the technologies it...

...for more information. In addition to providing financial data, this Canadian site has added RealAudio **sound clips** from experts and maintains several discussion forums where visitors can leave comments. All of the...

...<http://www.webinformant.com>, an e-mailbased newsletter on Web and marketing issues. Strom also **runs** the WebCompare site at <http://www.webcompare.com>, a detailed comparison of over 100 Webbyour corporate toolbox should include some really advanced human resources. If you have **limited** Web resources. consider strategic outsourcing. Outsource the design, perhaps the testing, and maybe even the...

...who does the job, the tools should be chosen carefully. Saqqara's Step Search Enterprise **software** uses the Oracle? database and **runs** on Sun Microsystems' Solaris and Hewlett-Packard's HP/UX platforms. A Windows NT version...

...maker of Cold Fusion Professional 2.0. (\$595 plus shipping and handling. The price includes **free** upgrades to the next version and use of all beta tools as they come out for the next year). The product Will **run** on any Windows95 or NT 4.X server. Allaire's Web site (www.coldfusion.com...

...help corporations get started with Web application development. Cold Fusion has hooks to anything that **runs** on an NT **server**. At the Cold Fusion site, you can **download free software** development kits that allow you to make a variety of applications, including those that are enabled for wireless communication. For further information, call 888-939-2545.

If you **run** Oracle, Sybase, Informix, or Microsoft SQL Servers, MacroMedia's Backstage Enterprise Edition is a development...

...even a novice to connect video and audio production to large databases; a server that **runs** on any Web server and allows you to gather information from any accounting or customer...

Plugin software interconnecting medium for use in digital audio player , has instructions to perform creating host process to accept modular software components that are interchangeable to form multiple software processes

Abstract (Basic):

... The medium has instructions to perform creating a host process to accept modular **software** components that are interchangeable to form multiple **software** processes. Data is received at process from the components indicative of a size of a test data **sample** . An access is permitted to the **sample** of a data stream. A request is received from the components to interconnect the components to another component based on the **sample** .

... a) a method of implementing security in a **plugin** program...

...Used for interconnecting **plugin software** in a digital media **player running** on a PC to provide new capabilities e.g. reproducing media file, viewing 3-D interactive media, **playing** sound and **video file** , performing calculation to a web browser...

...The host process is created to accept the modular **software** components that are interchangeable to form multiple **software** processes, thereby permitting a system to upgrade its capabilities without being **limited** by the host process familiarity with them...

...The drawing shows a functional illustration of **plugins** other than file

format handlers are iterated through to permit a more robust capability for...

New sensor comprising a mechanical system for collecting sample , an optical system with two optical channels, and an electronic system coupled to the mechanical...

Abstract (Basic):

... A sensor for detecting biomaterials contained in a biological **sample** comprising a mechanical system operative to collect the bioaerosol **sample** , an optical system coupled and having two optical channels, and an electronic system coupled to...

... 1) detecting biomaterials contained in a bioaerosol **sample** comprising...

...a) exciting the aerosol **sample** emitting at least two emission signals

having wavelengths differing from one another; and...

...respective threshold to selectively detect the biomaterials of interest from materials contained in the bioaerosol **sample** and having a non-biological origin; and...

...The sensor is useful for detecting biomaterials contained in a biological **sample** , e.g. for detecting potentially pathogenic aerosol (claimed...

...The figure depicts the sensor for detecting biomaterials contained in a bioaerosol **sample** .

Technology Focus:

... Sensor: The sensor comprises the optical system that is operative to excite the collected bioaerosol **sample** emitting at least two emission signals of different wavelengths each of which is detected by...

...channels. The optical system includes a source of light selectively energizable to excite the bioaerosol **sample** , each of the optical channels comprising a photomultiplier tube (PMT) configured to selectively detect a...

...signal. The sensor further comprises a photocell filled with a metered amount of the bioaerosol **sample** and located between the source of light and the optical channels, the **sample** emitting the at least two emission fluorescent signals simultaneously during the energization of the source of light. The **sample** can emit a first one of the at least two emission signals during the energization...

...is fluorescent and the other emission signal is phosphorescent. The source of light is a **flash** lamp controllably pulsing the bioaerosol **sample** with light pulses, each of the optical channels further comprising a filter and a lens...

...channels being configured to detect a time-delayed phosphorescent emission signal generated by the bioaerosol **sample** upon de-energization of the source of light to allow for the resolution to be...

...the PMTs and operative to control its time delay activation. The mechanical system includes a **sample** concentrator configured to collect bioaerosol on an impaction surface, where the impaction surface is liquid...

...a plurality of reservoirs in for communication with the concentrator and operative to store a **sample** fluid and chemicals adapted to mix with the collected bioaerosol **sample** to improve luminescent characteristics of the collected **sample** . It further comprises a plurality of controllably operating flow controlling components including peristaltic pumps which are located along a fluid path between the **sample** fluid reservoir and the concentrator and the concentrator and the chemicals reservoir and pinch valves...

...and operative to draw aerosol into the concentrator. The electronic system includes a processor and **software executed** on the processor for controlling **timing** and sequence of the mechanical and optical systems, the processor being operative to receive the...

...of non-biological origin. This sensor further comprises a waste reservoir configured to receive a **sample** containing the materials of

non-biological origin and a **sample** reservoir configured to store a **sample** containing the biomaterials. Preferred Method: In detecting biomaterials contained in a bioaerosol **sample**, the at least two emission signals are fluorescent signals, where the method further comprises selectively...

...The third emission signal is a phosphorescent signal. The method further comprises collecting the bioaerosol **sample** on a liquid surface or on a solid surface before energizing the source of light; and adding a heavy atom perturber to the collected bioaerosol **sample** for detecting the third emission signal, the heavy ...light to generate a predetermined number of discontinues pulses of light incident upon the bioaerosol **sample**, the at least two emission signals emitted during the energization of the source of light...

...atom perturber to minimize fluorescence of material of non-biological origin contained in the bioaerosol **sample**. Preferred System: The central processing unit of the system is operative to trigger an auxiliary...

System and method for constructing music file database and selling music file by using internet music broadcast program

Abstract (Basic):

... A **music file** database construction and **music file** sale system and method is provided to construct a **music file** database by using radio musics and time table data offered by internet broadcasting stations, and to enable a user to search for and purchase a desired **music file** .

... that the music broadcasting station broadcasts a music(204, 206, 208), the server generating a **sample** music by extracting a part of the music, for example the first measure or the...

...singer, a name of the internet broadcasting station, the broadcast time and others with the **sample** music at the music database(212). In a step of checking a music registration, the...

...broadcast music with that of the registered music. The user can search for a desired **music file** from the music **database**, request to **download** the **sample** of the desired **music file** or **send** a **purchase** order on the desired music...

COMMUNICATION SYSTEM, **SOFTWARE** UPDATE METHOD, AND **SOFTWARE** UPDATE PROGRAM

ABSTRACT

PROBLEM TO BE SOLVED: To **trial** -operate by using new **software** at update of **software** , and select whether the **software** is completely moved to an operation by using the new **software** or a state before **software** updating is recovered.

SOLUTION: The **software** update control part 108 of a slave station 102 stores first **software** in first and second **software** storage parts 105 and 106, **downloads** the new **software** (second **software**) from a host station 101 when requested for updating and overwrites the **software** in the second **software** storage part 106 when the update is requested from the host station 101, and **trial** -operates a **communication** device specific function part 107 by using the second **software** . When the operation is formally moved to a new state, the second **software** stored in the second **software** storage part 106 is overwritten in the first **software** storage part 105, and when the operation is recovered to an original old state, first **software** stored in the first **software** storage part 105 is overwritten in the second **software** storage part 106.

Title: 2PSM: an efficient framework for searching video information in a limited -bandwidth environment

...Abstract: novel technique, called 2-Phase Service Model, for streaming videos to home users in a **limited** -bandwidth environment. This scheme first delivers some number of non-adjacent data fragments to the...

... Phase 1. The missing fragments are then transmitted in Phase 2 as the client is **playing back** the video. This approach offers many benefits. The isochronous bandwidth required for Phase 2 can...

... medium. The data fragments received during Phase 1 can be used to provide an excellent **preview** of the video. They can also be used to facilitate VCR-style operations such as...

...this method are less expensive because the fast-forward and fast-reverse versions of the **video files** are no longer needed. Eliminating these files also improves system performance because mapping between the...

...Phase Service Model is able to handle VCR functions efficiently. We also implement a video **player** called FRVplayer. With this prototype, we are able to judge that the visual quality of the **previews** and VCR-style operations is excellent. These features are essential to many important applications. We...

Title: Instructional uses of demonstration disks

Abstract: **Demonstration** programs **distributed** by **software** publishers are an inexpensive source of **software** examples for student use. These programs can be used in a variety of computer classes and for a variety of assignments. They provide examples of different **software** types and of different approaches to interfaces and integration. In spite of a few disadvantages, using **demonstration** programs as a supplement to lecturing on **software** packages and to using full versions of programs can be a cost-effective and instructionally...

... in computer classes. Students can experience the "look and feel" of a wide variety of **software** packages without the school absorbing the costs associated with the **purchase** and **storage** of full versions of a complete range of packages. And most importantly, students can better understand and better recall the types, uses, and features of **software** that they have had the experience of running (if even only in **demonstration** form) than

they can from either reading about these packages in the text or in...

Source: VOLUME 61/01-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 299.

...micro level translates into macro effects. Careful attention is paid to how asymmetric information and **free**-riding exert strong influences on the behavior of individuals.

In the first chapter, a simple model of open-source **software** development is presented. It is found that either too little development or redundant development effort...

...shown to resolve the empirical puzzle as to why some extremely useful and fairly simple **software** does not get written while more complex **software** sometimes does. It is shown that a modular design can improve or worsen the performance...

...have the "right stuff" to grow in size and profitability in the long **run**. The critical input market (that for skilled labor) is imperfectly competitive. By extending the literature...

...over the contribution of small firms to economic growth.

In the third and final chapter, **players** in a war of attrition care about the identity of the winner, even when they lose. In particular, a three **player** war of attrition is considered. Two "team" **players** enjoy a fraction of their valuation when their partner wins. The remaining, "solo" **player** benefits only by winning the war. Imposing team symmetry, the solo **player** drops out more quickly than either team **player**. The incentive to avoid fighting costs by **free** riding on a teammate is outweighed by a strategic commitment effect. Team **players** thus continue to fight even when they have no chance of winning a subsequent two-**player** subgame with the solo **player**. Examining **limiting** results, when the "caring coefficient" between the team **players** is small, a selection result obtains: The solo **player** drops out immediately, allowing the team **players** to then compete in a standard two-**player** war of attrition. (Copies available exclusively from MIT Libraries, Rm. 14-0551, Cambridge, MA 02139...

A sensor element is mounted on a vehicle such that a **free** end extends beyond the vehicle. The other end of the sensor element is electrically conductive and forms a terminal engageable with a second terminal arranged on the vehicle upon the sensor element being moved in a predetermined direction indicative of the vehicle approaching an obstruction. The two terminals are located in an electrical alarm circuit including an alarm device, the two terminals being wholly enclosed within a housing structure.

The housing includes a non conductive resilient body surrounding the other end of the sensor. The housing includes a tubular conductive body received within the resilient body with the conductive body means extending from it. The second terminal is formed by an internal surface region of the tubular body.

ADVANTAGE - All contact surfaces sealed against effects of weather.
